CHALLENGES IN ASSESSING FERTILIZER CONSUMPTION AND FERTILIZER USE BY CROP IN GHANA

NOVEMBER, 2014

Preface and Acknowledgement

This study was Commissioned and Funded by the North and West Africa Division of the International Fertilizer Development Center (IFDC NWAFC). The consultant is grateful for the opportunity that was offered him, which has enhanced his knowledge and experience on issues related to the fertilizer industry in Ghana and also afforded him the opportunity to contribute to the discussions on Fertilizer Use by Crop (FUBC) in the country.

The consultant owes a lot of gratitude to colleagues in the public and civil service of Ghana, who have contributed in various ways to the preparation of this report. Special thanks go to the following colleagues:

1. Daniel Wawo of the Statistics, Research and Information Directorate of the Ministry of Food and Agriculture;
2. Michael Owusu of the Directorate of Crop Services of the Ministry of Food and Agriculture;
3. Francis Dzah of the Ghana Statistical Service;
4. Samuel Mortey of the Ghana Statistical Service;
5. Sandra Asimenu of the Ghana Statistical Service; and
6. Felix Brakatu of the Ghana Input Dealers Association.

The consultant also benefitted from quite a number of previous publications, which he prefers to cite as references to acknowledge their contributions to this work.

The consultant would also like to acknowledge with many thanks for the support received from the supervisor of the study, Mr. Patrice Annequin, the AfricaFertilizer.org Coordinator at the IFDC office in Accra, Ghana and his staff, Japhet Larney and Antonina Bawuah. We are greatly indebted to them for their guidance.
